

CUTMASTER GN300C

Product Data Sheet

Product Briefs

GN300C nitrile work gloves offers premium personal protection, grip, and dexterity so you can handle tools, machinery, and hazardous tasks with ease. Made with ultra-resistant, high performance CutMaster™ fabrics, these gloves will ensure superior blade cut and abrasion resistance without compromising comfort and dexterity. They are partially coated with a textured protective layer of sanded nitrile for a superior grip in wet, dry, and oily applications. Simultaneously, the non-coated, textile section on the back of the glove facilitates cooling and air flow to improve flexibility and preserve breathability. The enhanced grip and flexibility provided by the nitrile coating, and the superior protection from the HPPE fiber give this glove the ideal combination of comfort, functionality, and protection.
